Public Views of H1N1 Vaccine Shortage

The study was conducted for Harvard University via telephone by SSRS, an independent research company. Interviews were conducted from October 30 – November 1, 2009 among a representative sample of 1073 respondents age 18 and older. Of those, a total of 141 respondents were Hispanic and a total of 107 were African American. The margin of error is +/-3.8% at the 95% confidence level.
