

14 Months

When covid came there was death and despair
Back then we didn't know that it traveled through air
March thirteenth is the day of doom
After covid broke out in a Biogen room
School was out and we went on to zoom
But to be honest, I'd rather be in a classroom
I have been told to wear a mask
It's annoying that I have to do it in class
But all of a sudden the rules change
We can be unmasked outside, isn't that strange?
The rules keep shifting and it isn't fun
Couldn't we just stick with rule number one?
My friend has covid what should I do
It's so confusing I have no clue
Who should I believe who should I trust
Who is right and who is unjust
I'm eleven that's one year behind
I just want to get my vaccine in time
In time for school, in time for fun
I just can't wait for covid to be done.
